

Finally, it's Summer!

School is out for the summer and the sun is out to play. Be sure to protect you and your mini-me's eyes from the harmful UV rays produced by the sun. Polarized sunglasses are just as important for you as they are for your children, especially for all the long days spent out at the beach and participating in other outdoor activities.

Beach days are the perfect days to catch up on all your reading. No need to wear sunglasses over your glasses outside, we offer polarized sunglasses in your prescription! Featuring brands such as Ray Ban

The **Hoya Tact lens** is designed specifically for computer use; the intermediate portion of the lens (the distance between you and your computer screen) is the largest portion of the lens, making computer use more comfortable.

The **Recharge Non-Glare** protects eyes from damaging blue light wavelengths by reducing the blue light that is emitted from back-lit devices such as cell phones, tablets and computers
